Aluminum Combination Window with a Wide Center Light

Product Specification Schedule

Frame material	6063-T5 aluminum alloy. Profile section, frame depth and wall thickness specified for the order.
Selected window layout	Wide center light, two upper side sashes and two lower side lights
Double-glazing build-up	5 mm + 12A + 5 mm. Glass treatment, coatings, spacer and gas fill identified separately.
Frame finish	Custom powder coating; dark appearance selected. Final finish code, sheen and texture by sample.
Size & divisions	Overall frame width and height, center-light width, side-section widths and division heights set in the project window schedule.
Side-sash hardware	Two upper side sashes with visible handles. Operating hardware, handing, movement and accessories named in the order specification.
Wall & performance interfaces	Wall opening, sill, fixings and perimeter joint coordinated for the installation; any stated performance supported for the proposed complete window.

Window layout

Wide center + paired side sashes: Wide center light, two upper side sashes and two lower side lights

Combination Window Order Package

Window assembly: Aluminum outer frame, five-light layout, two upper side sash frames, specified glazing, seals and the named operating hardware, listed by opening mark.

Selected finishes & additions: Powder-coating reference, handle finish, glass treatments and any screens or restrictors expressly included in the quotation.

Size & technical schedule: Overall size, individual divisions, viewing side and sash operation; glazing and hardware schedule plus any required project-specific performance documents.

Delivery & site work: Packing and freight itemized; measurement, wall preparation, fixing materials, flashing, final sealing and installation responsibilities defined separately.
