# Sliding Shower Doors with 8 mm Ultra-Clear Glass

**Product Specification Schedule**

| | |
|---|---|
| **Model & opening method** | JY-223; two-panel sliding shower door. Panel movement and opening side are defined by the ordered layout. |
| **Selected frame finish** | Black frame and stainless-steel handle; 8 mm ultra-clear tempered glass. |
| **Glass specification** | 8 mm ultra-clear tempered glass. Panel dimensions, edge details and hardware positions follow the selected door configuration. |
| **Frame material basis** | 304 stainless steel is the listed frame material. Track, internal profile and mounting components are identified for the selected assembly. |
| **Wheels & handle** | Nylon wheels; stainless-steel handle included. Handle finish choices: black, silver and brushed titanium. |
| **Opening & entry dimensions** | Finished opening width and height, panel layout and clear entry width specified for the project. Wall plumb and base level considered with the selected hardware. |
| **Threshold & installation** | Threshold, guide, seal and fixing details matched to the base and wall substrate. Installation requirements follow the selected assembly's drawing and instructions. |

### Shower door frame finish

Black: Black frame and stainless-steel handle; 8 mm ultra-clear tempered glass.

Silver: Silver frame and stainless-steel handle; 8 mm ultra-clear tempered glass.

Brushed Titanium: Brushed Titanium frame and stainless-steel handle finish; 8 mm ultra-clear tempered glass.

### Shower Glass, Frame, Hardware & Site Work

Door assembly: JY-223 sliding door with 8 mm ultra-clear tempered glass, selected frame finish, nylon wheels and included stainless-steel handle.

Installation components: Track, guides, seals, stops and fixings itemized for the selected assembly; any spare hardware identified separately.

Shower base & site work: Base, waterproofing, wall preparation, removal of an existing enclosure and installation separately scoped; shower fittings are separate products.

Glass packing & delivery: Panel and edge protection, protected hardware packs, shipment dimensions, freight and unloading arrangements identified for the order.
