Concealed Shower Systems with Rain & Waterfall Outlets

Product Specification Schedule

Model & installation	CS-1001/B/G/Q family; concealed shower system with in-wall installation.
Selected shower configuration	Brass concealed shower system with overhead rain and waterfall outlets, a hand shower and temperature/outlet controls. Finish identified for the order.
Material basis	Brass is listed for the CS-1001 family. The component list identifies the material and surface finish of the ordered assemblies.
Shower outlets	Overhead rain and waterfall modes, plus a hand shower. Outlet combinations and operation follow the selected valve and diverter arrangement.
Temperature & outlet control	Thermostatic mixing and outlet selection. Valve operating conditions, temperature limits and any required project approvals are specified for the ordered control package.
Dimensions & finished wall	Overhead size and projection, trim dimensions, outlet centers and valve setting depth in mm are coordinated with the selected assembly and finished wall build-up.
Water & connection interfaces	Hot/cold supply, operating pressure in bar or psi, flow in L/min or gpm, connection size/thread standard and outlet routing are matched to the ordered valve package.

Concealed shower configuration

CS-1001 Concealed Set: Brass concealed shower system with overhead rain and waterfall outlets, a hand shower and temperature/outlet controls. Finish identified for the order.

Concealed Shower Assemblies, Rough-In & Bathroom Works

Visible shower components: Overhead rain/waterfall assembly, hand shower and visible controls, with their ordered finish and quantities identified.

Valve & connection package: Matching concealed mixing/diverter components, trim, hand-shower hose, holder and wall connection itemized in the quotation.

Site plumbing & finishes: Wall opening and support, supply and outlet pipework, waterproofing, tiling, installation and commissioning separately scoped.

Packing & delivery: Protected finish surfaces and separated labeled component packs; packing, freight destination and final delivery identified for the shipment.
