Five-Tier Gray Display Shelf with a Drawer

Product Specification Schedule

Shelf configuration	Five horizontal display levels on metal supports, with one integrated drawer unit among the open storage areas. Individual shelf; display objects are separate.
Selected configuration	Five horizontal display levels with a single integrated drawer, taupe/light-gray glossy surfaces and brushed gray steel plate supports. Substrate, internal drawer finish and supplied fittings are identified for the order.
Shelf & drawer finish	High-gloss light-gray lacquer finish, with the taupe-gray appearance shown. Exact panel substrate, construction, edge treatment and internal finish are specified for the order.
Metal reference	Brushed gray steel plate is listed for the metal construction. Actual grade, coating, part allocation, connections and floor-contact details need a defined specification.
Overall & usable size	Overall width, depth and height with units, usable shelf openings and clear depths, drawer interior and full floor footprint require confirmed measurements. The order identifies axes and units for each measurement.
Drawer & storage hardware	One integrated drawer provides enclosed storage. Interior dimensions, opening travel, runners, closing action, handle detail and any lock are confirmed for the selected drawer package.
Use, support & assembly	Required shelf and drawer loads, floor and wall conditions, restraint/fixing package, assembly format and supplied parts are defined for the actual unit. Packed size and weight are separate receiving information.

Display shelf configuration

Taupe / Gray Steel: Five horizontal display levels with a single integrated drawer, taupe/light-gray glossy surfaces and brushed gray steel plate supports. Substrate, internal drawer finish and supplied fittings are identified for the order.

Display Shelf, Drawer, Fittings & Delivery

Individual shelving unit: Five-tier display shelf with one drawer, selected appearance, quantity and room reference. Books, ornaments and other display contents are separate.

Surface & metal package: Actual shelf/drawer substrate and build, light-gray lacquer reference, internal finish, gray steel specification and connection details.

Storage & site requirements: Measured openings, drawer interior and travel, required storage loads, complete footprint, floor/wall conditions and agreed restraint or fixing parts.

Packing & assembly scope: Finished-edge and steel-surface protection, supplied fittings, assembly format, packed dimensions/weight, receiving route and delivery destination.
