Walnut-Veneer Bookcase with Alternating Curved Panels

Product Specification Schedule

Bookcase configuration	Three horizontal display tiers with alternating curved vertical wood-finished panels, gray inset faces and open display positions. One low-based bookcase; no independently rearrangeable module system established.
Selected bookcase appearance	Natural walnut veneer with a warm brown appearance, alternating curved vertical panels and gray inset faces across three horizontal display tiers. Board construction, inset-face material and the selected coating and edge treatment are identified for the order.
Veneer & board materials	Supplier-listed natural walnut veneer and high-density board. Actual board build, veneer placement, thickness, density and connection details are identified for the selected construction; no solid-walnut unit assumed.
Insets & finish	Gray inset appearance and a listed water-based lacquer reference. Inset-face composition, coating reference, color, sheen and exposed-edge treatment are specified separately; no leather allocation or certified performance inferred.
Overall & usable openings	Overall width, depth and height with units; clear width, height and usable depth at each required display position. Curved panels and inset faces mean overall dimensions do not define a standard cube opening.
Support & use requirements	Actual shelf spans, connections, floor-contact parts, rear finish and access, required loads and any restraint package are selected for the furniture and placement. Room-divider or wall-mount suitability is not assumed.
Supply & receiving	Individual bookcase quantity, room reference, supplied assembly fittings and responsibilities, protective packing, actual packed size and weight, receiving access and destination. Display objects and room furnishings separate.

Bookcase appearance

Walnut Veneer / Gray Insets: Natural walnut veneer with a warm brown appearance, alternating curved vertical panels and gray inset faces across three horizontal display tiers. Board construction, inset-face material and the selected coating and edge treatment are identified for the order.

Bookcase, Veneer, Display Openings & Delivery

Individual bookcase: Quantity, room reference and measured three-tier configuration, with the actual curved-panel and display-opening arrangement. Other furniture and display objects are separate.

Veneer, board & inset finish: Walnut veneer and board construction, veneer direction and edge treatment, actual gray inset material and the agreed lacquer color and sheen.

Fit, loads & support package: Usable openings, rear finish and access, required shelf loads, connections, floor-contact and restraint fittings, assembly format and supplied parts.

Packing & destination: Protection for veneer, curved edges and insets; actual packed size and weight, assembly responsibilities, receiving route and delivery destination.
