Floor-Standing Full-Length Mirror with Side Supports

Product Specification Schedule

Mirror configuration	Floor-standing full-length mirror with a tall rounded-corner portrait form, framed perimeter, side supports and lower crossbar.
Selected mirror	Silver-mirror surface in a tall rounded-corner framed assembly with side supports and 5 mm mirror glass.
Mirror-glass reference	5 mm silver mirror as listed. This is the mirror-glass thickness, separate from frame thickness, overall assembly depth and stand footprint.
Visible support form	Side uprights, visible side fittings and a lower crossbar support the framed mirror. Exact fitting and connection details are identified for the ordered assembly.
Frame, stand & backing	Frame, stand, backing material and visible finishes are specified separately for the order; no single frame material or material grade is assumed for the complete assembly.
Overall size & placement	Overall mirror and stand width, height, depth and floor footprint require confirmed dimensions with units. Viewing position and room access use those actual measurements.
Fittings & use requirements	Supplied fittings, floor-contact protection, any restraint and any required adjustment function are defined for the selected stand and installation conditions.

Mirror configuration

Silver Mirror: Silver-mirror surface in a tall rounded-corner framed assembly with side supports and 5 mm mirror glass.

Mirror Glass, Stand & Delivery Package

Floor-mirror assembly: Silver-mirror glazing, framed portrait form, side-support stand and crossbar; quantities by room or dressing area.

Material & surface specification: Listed 5 mm mirror-glass basis, ordered frame/stand/backing materials and agreed visible finishes.

Size & fittings: Confirmed unit-bearing overall dimensions, stand footprint, supplied connections, floor-contact parts and any required adjustment or restraint arrangement.

Packing & destination: Mirror-edge and finished-part protection, actual packed dimensions and weight, delivery format, receiving location and local assembly scope.
