Gray TV Console with Textured Fronts

Product Specification Schedule

Console configuration	Single low TV console with textured closed fronts at the ends, central open shelves and a visible cable-access opening.
Selected appearance	Single gray TV console with a brushed-metal appearance on the textured fronts, dark central open shelves and cable access; complete part materials and hardware are specified for the order.
Front and interior finish	Gray brushed-metal appearance on the textured fronts, contrasted with dark top and open-shelf surfaces. Substrates, metal grades and the finish system are specified separately.
Doors and shelf storage	Enclosed end storage and open central compartments. Door operation, hinges or other hardware, internal fittings and any shelf adjustment are confirmed for the supplied cabinet.
Media and cable interfaces	Equipment opening dimensions, connector space, cable routing and ventilation requirements are coordinated with the actual devices. Cable access does not establish powered outlets, included electronics or an equipment-cooling rating.
Overall fit and loading	Console length, depth and height, screen-stand footprint, top and shelf load limits, and any restraint requirements need confirmed specifications with units. No maximum screen size is assigned from the pictured console.
Delivery and assembly	The order identifies assembly format, supplied fittings, packing dimensions and weight, receiving access and any site assembly or fixing responsibilities.

TV-console finish

Gray: Single gray TV console with a brushed-metal appearance on the textured fronts, dark central open shelves and cable access; complete part materials and hardware are specified for the order.

Console, Hardware & Delivery Package

Individual TV console: Gray textured-front cabinet with central open storage; quantity and room references identify each console. Screens and media devices are separate items.

Part materials and finish: Front, top, shelf and cabinet-body materials, gray and dark finish references, and ordered door and shelf hardware.

Equipment fit and fittings: Unit-bearing cabinet and compartment dimensions, actual screen and equipment loads, cable and ventilation needs, and any specified restraint or floor-contact parts.

Packing and destination: Protection for the textured faces and shelf edges, assembly format, actual packed size and weight, delivery destination and receiving access.
