# Textured Porcelain Patio Pavers, 12-20 mm

**Product Specification Schedule**

| | |
|---|---|
| **Material and application** | Porcelain outdoor pavers with a textured stone-look surface for selected patio and walkway layouts; series and application identified for the order. |
| **Configuration options** | 20 mm porcelain paver; selected format, support system and outdoor application confirmed for the order; 12 mm porcelain paver; selected format and supported installation detail confirmed for the order |
| **Paver format** | Selected length x width in mm; actual finished dimensions, edge type and joint width recorded with the product series and laying plan. |
| **Surface reference** | Stone-look color, face texture, pattern direction and design variation selected by the series and approved material reference. |
| **Area and quantity** | Area per piece (m2) = length (mm) x width (mm) / 1,000,000. Net paved area, joints, perimeter cuts and spare pieces scheduled separately. |
| **Base and finished levels** | Paver thickness plus selected bedding or support depth; substrate, drainage, thresholds and edge restraint coordinated for the installation. |
| **Installation and ratings** | Bonded, supported or raised installation requires documentation for the selected series and system; no declared vehicle load, pedestal compatibility, slip or freeze-thaw rating. |

### Porcelain paver thickness

20 mm: 20 mm porcelain paver; selected format, support system and outdoor application confirmed for the order

12 mm: 12 mm porcelain paver; selected format and supported installation detail confirmed for the order

### Porcelain Pavers, Cut Pieces & Separate Patio Work

Porcelain paver supply: Selected series, thickness, face and format, with full-piece quantities for each paved zone.

Cuts and finishing pieces: Scheduled border cuts, drain openings, exposed-edge treatment, separately confirmed trim or coping, and agreed spare pieces.

Installation system: Base, adhesive or supports, jointing, drainage, waterproofing and edge restraints identified separately, including site-supplied components.

Packing and site labor: Shipment quantities, protective packing and destination freight; unloading, storage, base work and local laying assigned separately.
