Two-Panel Wood Interior Door with Engineered Stiles

Product Specification Schedule

Door configuration	Interior wood door with engineered stiles and two-panel framed appearance; one leaf configuration, with frame and hardware scope scheduled separately.
Material and finish package	Wood interior door with engineered stiles, a two-panel framed appearance, mortise hinges and magnetic latch; exact material, finish, leaf and frame schedule specified per opening.
Leaf and opening dimensions	Leaf width x height x thickness in mm; outside frame size, rough opening and clear passage recorded separately.
Panels and frame members	Two-panel elevation; stile and horizontal-member widths, panel proportions and visible profiles identified on the door drawing. Internal joint/core specification confirmed for the supplied leaf.
Frame and trim	Jamb depth matched to finished wall thickness in mm; casing profile, frame material, seals and surface reference listed where included.
Hinges and latch	Mortise hinges and magnetic latch with matched strike; actual references, hinge positions, handle preparation, backset and passage/privacy function scheduled.
Handing and installation	Viewing side, hinge side, swing direction, finished-floor datum and clearances recorded per opening; required ratings apply only to the documented complete assembly.

Interior wood door configuration

Two-Panel Framed Door: Wood interior door with engineered stiles, a two-panel framed appearance, mortise hinges and magnetic latch; exact material, finish, leaf and frame schedule specified per opening.

Wood Door Leaf, Frame & Prepared Hardware Package

Door leaf: Scheduled wood leaf, engineered stiles, two-panel elevation, material build-up and finish reference for each opening.

Frame and trim: Jambs, casing, seals and matching finish included only where scheduled; dimensions tied to the finished wall.

Hardware and machining: Selected mortise hinges, magnetic latch/strike and any handles or privacy hardware; preparation matched to their actual references.

Delivery and fitting: Protected packing and opening labels, destination and receiving arrangements; frame fixing, alignment, wall finishing and local labor assigned separately.
