Wall-Mounted Basin Faucet with Round Escutcheons

Product Specification Schedule

Faucet configuration	Wall-mounted bathroom basin spout with a separate single lever and round escutcheons; matched concealed rough-in assembly.
Trim and valve package	Wall-mounted basin spout and single lever with separate round escutcheons; matched concealed valve, finish and actual installation dimensions identified in the order.
Spout and basin dimensions	Spout reach from finished wall to outlet center in mm; outlet height, basin rim and bowl position recorded on the same fit schedule.
Trim dimensions and surface	Escutcheon diameter, center spacing and hole preparation in mm for the selected trim; actual surface, texture and underlying materials identified separately.
Concealed valve	Matched valve and cartridge reference; permitted rough-in depth from finished wall, connections and service method specified for the assembly.
Water and compliance data	Required flow, pressure and temperature limits, connection standard and destination approvals confirmed for the supplied configuration; no generic thermostatic or anti-scald claim.
Supply and site scope	Spout, lever, escutcheons, valve, fittings and seals itemized; basin/drain, pipework, wall preparation and local installation assigned separately.

Wall-mounted basin faucet configuration

Round-Escutcheon Single Lever: Wall-mounted basin spout and single lever with separate round escutcheons; matched concealed valve, finish and actual installation dimensions identified in the order.

Wall Faucet Trim, Rough-In Valve & Separate Plumbing Items

Visible trim: Selected wall spout, lever and round escutcheons with the agreed surface and dimensional reference.

Concealed components: Matched rough-in valve, cartridge, connection and fixing parts; extensions and service components listed where required.

Basin and plumbing: Basin, drain, trap, supply isolators and local plumbing materials identified separately; actual connection and approval requirements recorded.

Delivery and installation: Protected packing and destination-based delivery; wall preparation, pipework, testing, final fitting and commissioning assigned separately.
