Insulated Steel Sectional Garage Door with a Polyurethane Core

Product Specification Schedule

Door construction	Insulated sectional garage door with an outer steel skin, polyurethane foam core and inner steel skin; actual gauge and panel thickness scheduled per order.
Panel selection	Custom sectional garage door with two steel skins and a polyurethane foam core; actual panel thickness, gauge, finish, track/balance hardware and operator scope specified for the order.
Opening dimensions	Finished opening width x height in mm; jamb, lintel, floor level and available fixing substrate recorded.
Operating envelope	Headroom, left/right sideroom and overhead backroom in mm, with beams, pipes, lights and storage obstructions shown.
Track and balance package	Track arrangement, hinges, rollers, balancing hardware, supports and supplied fixing parts matched to the actual door dimensions and weight.
Finish and documentation	Powder-coat color/sheen and panel pattern to selected reference; any thermal, wind or acoustic target requires assembly-specific supporting data.
Operator and site scope	Motor, controls, safety devices and manual-release arrangement itemized where included; power supply, installation and commissioning assigned separately.

Insulated steel door construction

Double-skin steel + polyurethane core: Custom sectional garage door with two steel skins and a polyurethane foam core; actual panel thickness, gauge, finish, track/balance hardware and operator scope specified for the order.

Insulated Garage Door Assembly & Separate Site Work

Door sections: Scheduled steel/foam/steel panels with the selected pattern, finish and actual dimensions.

Operating hardware: Agreed tracks, hinges, rollers, balance components, seals and supporting parts itemized for the selected assembly.

Motor and controls: Operator, controls, release and safety accessories included only where listed, with actual product instructions.

Delivery and installation: Protected packing and destination-based freight; building preparation, power supply, installation and commissioning assigned separately.
