Full-View Aluminum & Glass Sectional Garage Door

Product Specification Schedule

Door configuration	Custom aluminum-framed glazed sectional garage door; section heights and glass-bay arrangement coordinated with the opening.
Configuration options	Aluminum-framed sectional door with single-glazed panels; actual glass type, thickness, privacy treatment and panel sizes specified for the order.; Aluminum-framed sectional door with double-glazed panels; actual insulated-glass build-up, privacy treatment, weight and matched operating hardware specified for the order.
Glass specification	Actual glass type, pane thickness/build-up, single or double glazing, clear/frosted/tinted/obscured treatment and selected edge detail recorded per order.
Opening and overhead space	Finished opening width x height, headroom, left/right sideroom and overhead backroom in mm, including obstructions and final floor level.
Frame and finish	Aluminum frame/profile and powder-coat color/sheen to selected reference; section joints, glazing retainers and seals scheduled with the assembly.
Moving hardware	Tracks, hinges, rollers, balancing components and any reinforcement selected for the actual glazed door size and weight.
Drive and performance scope	Operator, controls and safety devices itemized where included; no unverified thermal, impact, wind, security or regional compliance rating.

Full-view garage door glazing

Single glazing: Aluminum-framed sectional door with single-glazed panels; actual glass type, thickness, privacy treatment and panel sizes specified for the order.

Double glazing: Aluminum-framed sectional door with double-glazed panels; actual insulated-glass build-up, privacy treatment, weight and matched operating hardware specified for the order.

Full-View Garage Door Components & Separate Site Work

Frame and glazed sections: Selected aluminum sections, glass-bay layout, actual glazing build-up, privacy treatment and frame finish.

Moving assembly: Agreed tracks, hinges, rollers, balancing parts, seals and required supplied reinforcement matched to actual door weight.

Operator and controls: Drive, controls, release and safety accessories included where itemized, with actual equipment instructions.

Delivery and local work: Glass-edge protection, component labels and destination-based freight; lifting, building fixings, power, fitting and commissioning assigned separately.
