Calacatta Gold-Style Engineered Quartz Slabs

Product Specification Schedule

Material series	High-mineral-content engineered quartz with a light base and warm gold-gray veining; natural marble and quartzite are different materials.
Configuration options	Calacatta gold-style engineered quartz, 15 mm source-series thickness reference; actual batch, slab format and finish confirmed for the order.; Calacatta gold-style engineered quartz, 20 mm source-series thickness reference; actual batch, slab format and finish confirmed for the order.; Calacatta gold-style engineered quartz, 30 mm source-series thickness reference; actual batch, slab format and finish confirmed for the order.
Slab-size references	Source-series standard 3200 x 1600 mm; selected-series jumbo up to approximately 3500 x 2000 mm subject to confirmed batch. Usable cut size recorded separately.
Surface and appearance	Polished or selected satin finish, with actual batch, color/vein reference and intended cutting direction confirmed for the order.
Fabrication choices	Cut-to-size pieces; eased, beveled or 45-degree mitered edge options. Sink, cooktop, faucet and outlet cutouts follow actual templates and drawings.
Layout and support	Finished piece sizes, seam positions, perimeter trim, edge build-up, cabinet/substrate support and handling access coordinated for the application.
Order and receiving	Slab or fabricated-piece count, selected thickness/finish, labels, edge protection, packing and destination itemized; actual stock, tests and installation conditions confirmed separately.

Engineered quartz thickness

15 mm: Calacatta gold-style engineered quartz, 15 mm source-series thickness reference; actual batch, slab format and finish confirmed for the order.

20 mm: Calacatta gold-style engineered quartz, 20 mm source-series thickness reference; actual batch, slab format and finish confirmed for the order.

30 mm: Calacatta gold-style engineered quartz, 30 mm source-series thickness reference; actual batch, slab format and finish confirmed for the order.

Engineered Quartz Material & Separate Fabrication Items

Slab material: Selected engineered-quartz series/batch, confirmed format, thickness, surface and quantity.

Cut pieces and edges: Fabrication included where scheduled: actual piece sizes, visible edges, miters, holes, cutouts and labels.

Layout and application: Vein direction, seams, support and equipment templates coordinated with the actual installation design.

Packing and local work: Protected packing and destination-based freight; unloading, templating, cabinet/support preparation, fitting and joints assigned separately.
