Custom Fixed Aluminum Storefront Glazing with Three Bays

Product Specification Schedule

Selected layout	Straight three-bay fixed glazing assembly; two vertical aluminum mullions and a continuous perimeter.
Configuration options	Two clear panes with a specified insulating cavity.; A coated insulating unit selected for solar and thermal requirements.; A glass interlayer within the complete insulating unit build.
Opening function	Fixed glass only; no entrance leaf, operating sash or opening hardware included.
Frame schedule	Aluminum perimeter/mullion sections, glazing pockets, thermal-break choice and visible finish identified for the selected system.
Dimensions	Overall frame width/height and each glass bay in mm; mullion positions and wall depth separately recorded.
Glazing interface	Complete pane/cavity/interlayer build with compatible beads, gaskets, glass support and glazing-side access.
Building interface	Head/side/sill support, anchors, perimeter joint, exterior drainage and glass replacement route coordinated with the building.

Fixed storefront glass package

Clear insulating glass: Two clear panes with a specified insulating cavity.

Low-E insulating glass: A coated insulating unit selected for solar and thermal requirements.

Laminated insulating glass: A glass interlayer within the complete insulating unit build.

Fixed Glazing Assembly & Separate Building Work

Fixed glazing assembly: Scheduled aluminum perimeter, two mullions, three glass bays and selected glazing retention/seals.

Selected system: Named section arrangement, thermal-break choice, complete glass build and visible finish reference.

Separate opening products: Entrance doors, operating windows and access-control hardware only as separately scheduled items.

Building & delivery: Structural support, weatherproofing and local fitting separate; glass-protective packing and destination freight itemized.
