Custom Aluminum Glass Louver Window with Manual Control

Product Specification Schedule

Window arrangement	Custom aluminum jalousie with horizontal linked glass blades rotating together in side clips.
Configuration options	Open view through the closed blades; no selected tint.; A selected tint changes the view color and daylight through the glass.
Frame & blade supports	Coated aluminum perimeter and side galleries; blade clips and end retention matched to the selected glass.
Control	Inside hand-operated lever and closed-position lock; control side and height scheduled per opening.
Blade dimensions	Glass length, blade width, thickness and end engagement in mm, matched to the actual gallery/clip system.
Frame dimensions & clearance	Overall frame width/height and open-blade projection in mm; screen offset and user access recorded separately.
Optional screen	Separate insect-screen assembly with blade clearance and removable cleaning access; not structural fall protection.

Louver window blade appearance

Clear glass blades: Open view through the closed blades; no selected tint.

Tinted glass blades: A selected tint changes the view color and daylight through the glass.

Louver Window Frame, Blades & Control Scope

Frame & galleries: Scheduled aluminum frame, side galleries, blade clips and selected coating.

Glass blades: Matched blade dimensions, clear or tinted appearance and the selected safety/edge preparation.

Control & screen: Manual lever, linkage and closing lock; screen only where scheduled.

Site & delivery: Perimeter fixing/sealing and local installation separate; protected and labeled glass/window packing by destination.
