Brown Upholstered Dining Chair with a Black Metal Frame

Product Specification Schedule

Chair configuration	Armless upholstered dining chair with a continuous seat-and-back profile, stitched edges and four black metal legs.
Selected chair	Brown upholstered seat and back with a black four-leg metal-frame appearance; molded polyurethane foam and a painted aluminum-alloy base are listed. The actual upholstery covering is specified for the order.
Upholstery & padding	Brown upholstery with molded polyurethane foam listed as the padding reference. The covering material, surface treatment, foam density and any required performance are specified separately for the order.
Base material & finish	Painted aluminum-alloy base as listed, with the black frame appearance selected. Exact alloy, individual part materials, connections and coating specification are confirmed for the purchased chair.
Listed size reference	50 x 55 x 80 cm, in the listed order. Width/depth/overall-height correspondence and the separate seat-height value require confirmation with the chair dimensions; this sequence is not a seat-height range.
Table & floor fit	Seat height, usable seat area, leg footprint, table-apron clearance and pull-out space use confirmed measurements with units. Floor-contact protection is matched to the actual legs and floor finish.
Use & delivery requirements	Required user load and duty, any stacking requirement, supplied fittings and assembly format are identified for the order. A load rating, stackability or commercial-use certification is not inferred from the four-leg form.

Chair configuration

Brown / Black Frame: Brown upholstered seat and back with a black four-leg metal-frame appearance; molded polyurethane foam and a painted aluminum-alloy base are listed. The actual upholstery covering is specified for the order.

Dining Chair, Materials & Delivery Package

Individual dining chair: Brown upholstered seat and back with the black four-leg frame configuration; chair quantities by table or room. Tables and accessories are separate.

Covering, padding & base: Actual upholstery-covering and finish reference, molded polyurethane padding specification, listed aluminum-alloy base and agreed black coating reference.

Size, use & fittings: Confirmed width/depth/overall-height axes and seat-height data, table fit, required loading, any stacking specification and floor-contact parts.

Packing & destination: Protection for upholstery, stitched edges and metal legs, assembly format, supplied connections, actual packed dimensions/weight and delivery destination.
