Three-Tier Wood & Marble Display Shelf

Product Specification Schedule

Display configuration	Three dark wood shelf levels with wavy exposed edges, light veined marble uprights and open display areas. The actual floor-contact and wall-support arrangement is defined for the assembly.
Selected shelf	Three dark, wavy-edged wood shelves with light veined natural-marble uprights. Ash-veneered wood, natural marble and mirror-polished stainless steel are listed material references; actual construction and support details are specified for the order.
Wood-component reference	Ash-veneered wood with a supplier-listed 36 mm component reference. This is not a 36 mm veneer-face thickness or a confirmed specification for every wood part; core and finished build-up are identified separately.
Marble-component reference	Natural marble with a supplier-listed 36 mm component reference. Actual stone selection, finished thickness, edge details and support interfaces are confirmed for the supplied components.
Steel & connection package	Mirror-polished stainless steel is listed among the materials. Its allocation to parts, grade and finish, connector design and supplied fixing package require the actual assembly specification.
Size & display fit	Overall width, depth and height, clear space between levels, usable shelf areas and full footprint need confirmed measurements with units. The 36 mm references do not provide those dimensions.
Support, loading & delivery	Floor contact, wall restraint or support, substrate, connections and required display loading are defined together. Delivery format, supplied fittings and local assembly responsibilities are identified for the order.

Display-shelf configuration

Dark Wood / Marble: Three dark, wavy-edged wood shelves with light veined natural-marble uprights. Ash-veneered wood, natural marble and mirror-polished stainless steel are listed material references; actual construction and support details are specified for the order.

Shelves, Marble Components, Connections & Delivery

Individual display unit: Three-tier Dark Wood / Marble configuration with the selected shelves, uprights and connection package; quantities and room references.

Materials & visible surfaces: Ash-veneered wood and natural-marble selections, listed 36 mm component references, actual component build-up and the specified steel/finish package.

Size, support & use: Unit-bearing overall and usable dimensions, display requirements, floor/wall support conditions, connector specification and required load information.

Protection & destination: Stone-edge, shelf-face and connector protection, assembly format, supplied parts, actual packed dimensions/weight, receiving access and delivery destination.
