68-Series Slim Aluminum Sliding Glass Doors

A four-panel aluminum sliding door with divided glass in a strong 3.0 mm-wall frame. The 68 Series takes single or double tempered glass, and the frame is powder coated in a RAL color or anodized.

Specifications

System	68 Series sliding door
Frame finish	RAL powder coat or anodized
Alloy	6063-T5 aluminum
Profile wall	3.0 mm
Glazing	Single or double tempered glass, 5, 6, 8 or 10 mm panes
Glass design	Divided by fine bars
Accessories	Included with the system
Minimum order	Made to your project quantities. Small item counts are accepted when they ship with the rest of your project list; the quotation confirms the quantity for each item.
Standards & certificates	Tell us the standards or certificates your market or project requires, and we confirm in writing which documents are available for this configuration before you order.

How We Quote the 68 Series

Made to each opening
We quote each door to its opening, with panel count, glass, finish and bar layout.

Accessories included
The system accessories are supplied with each door.

Glass and finish options
Glass builds and RAL or anodized finishes are priced per opening.

With windows
Windows and folding doors for the same building can be quoted in one order.
