138 × 22 mm Grooved WPC Decking Boards

Light beige wood-plastic composite deck boards with fine lengthwise grooves. The 138 × 22 mm hollow profile suits villa terraces, pool surrounds and garden decks.

Specifications

Profile	138 × 22 mm
Color	Light natural beige
Material	Wood-plastic composite (WPC)
Section	Hollow, round internal channels
Surface	Fine lengthwise grooves
Length	Quoted to your deck layout
Use	Outdoor decking
Minimum order	Supplied in full packing units from one production batch, rounded up from your area. Small lots can ship with the rest of your project list in one container.
Standards & certificates	Tell us the standards or certificates your market or project requires, and we confirm in writing which documents are available for this configuration before you order.

How We Quote WPC Decking

Priced per meter or m²
We quote by the linear meter or square meter, with board lengths cut to suit your deck layout.

Fixing system
Clips, screws, end caps, edge trims and joists can be quoted as one decking package.

Large terraces
For villa and hotel terraces, we quote from the deck plan so lengths and waste are worked out per area.

Packing
The quotation states the number of boards, the bundles and the shipping weight.
