120 Series Aluminum Sliding Window with Integrated Insect Screen

A thermally broken aluminum sliding window with insect screens built into the same frame as the glass sashes. The 120 Series lets a room be aired with the screen closed, and every unit is made to its opening.

Specifications

System	120 Series sliding window
Frame system	Thermal break aluminum
Operation	Horizontal sliding
Screen	Integrated insect screen
Layout	Glass sashes and screen panels in one frame
Size	Made to each opening
Glass	Chosen per project
Minimum order	Made to your project quantities. Small item counts are accepted when they ship with the rest of your project list; the quotation confirms the quantity for each item.
Standards & certificates	Tell us the standards or certificates your market or project requires, and we confirm in writing which documents are available for this configuration before you order.

How We Quote the 120 Series

Made to each opening
We quote every window by tag, with its size, layout, screens and glass.

Screens included
The insect screens are part of each window, not an add-on.

Glass options
Different glass builds can be priced per window so you can compare cost and performance.

With doors
Sliding and folding doors for the same building can be quoted in one order.
