Round Travertine Dining Table with Stacked Cylindrical Supports

Product Specification Schedule

Table configuration	Round natural-travertine dining top; three visible stacked cylindrical support groups connected by metal bars.
Material combination	Natural white matte travertine top with sandblasted champagne-gold 304 stainless steel components; stacked cylindrical support form.
Selected metric size	1600 mm diameter x 750 mm overall height, adopted procurement layout basis; final manufactured dimensions by accepted order drawing.
Stone surface	Natural white travertine, matte finish. Face range, pore treatment and edge profile scheduled together.
Chair-space allowance	Selected 600 mm pullback band: 1600 + 2 x 600 = 2800 mm planning diameter. Actual chairs, base positions and circulation govern final layout.
Assembly and floor interface	Order drawing defines top/base connections, thicknesses and floor contacts; packing list identifies component weights and handling.
Supply scope	Tabletop, base, agreed hardware and finish. Chairs, packing, freight, unloading and site assembly separately scheduled.

Table material combination

White travertine / champagne gold: Natural white matte travertine top with sandblasted champagne-gold 304 stainless steel components; stacked cylindrical support form.

Travertine Table Quote Schedule
