Custom 3D Solid-Wood Mosaic Wall Panels

Product Specification Schedule

Panel configuration	Custom dry-interior solid-wood block mosaic on plywood backing; flat square block faces in three stepped depths.
Configuration options	Selected solid oak square blocks in three thicknesses on a plywood module backing; Selected solid walnut square blocks using the same three-depth layout and plywood backing
Module and block faces	300 x 300 mm module; nine 98 x 98 mm faces, 3 mm internal gaps. 3 x 98 + 2 x 3 = 300 mm. Module-to-module joint selected 3 mm.
Backing and block depths	Selected 12 mm plywood backing; 12/18/24 mm solid wood blocks. Nominal wood-layer depths 24/30/36 mm before bondlines/coatings; attachment stand-off separate.
Wall setout	Two modules plus one 3 mm joint = 603 mm. Four modules 2 x 2 form 603 x 603 mm, excluding perimeter clearance. Cuts and borders by elevation.
Finish and attachment	Species/face range, grain, depth sequence, joint-backing color and clear finish scheduled. Actual wall, assembly mass and fixing access govern attachment.
Supply scope	Numbered modules and agreed finish; borders, cut units, spare pieces, fixing/support parts, samples, packing, freight and installation separately listed.

Mosaic block wood

Oak blocks: Selected solid oak square blocks in three thicknesses on a plywood module backing

Walnut blocks: Selected solid walnut square blocks using the same three-depth layout and plywood backing

Solid-Wood Mosaic Quote Schedule

Mosaic modules: Module quantity, solid wood species, block depth sequence, backing and accepted finish.

Edges and openings: Perimeter borders, outside returns, cut modules and completed service-opening edges.

Fixing and spares: Agreed attachment/support parts, replacement blocks and spare modules by actual references.

Packing and site work: Protected projecting faces, numbered packing, freight and separately assigned wall preparation/installation.
